

*Intelligent  
utilization of space...*

# ...the Klaus BikeSafe

... using the accessories from Klaus Multiparking

If you need room for car and bicycle ...

Make use of the easy-to-install Klaus BikeSafe that offers you maximum utilisation of your parking space.

The BikeSafe is easily installed on your platform on a suitable place using 4 screws.

All you need for the installation is an open-end wrench or a ratchet and suitable socket.

If sufficient space is available you can normally install the Klaus BikeSafe lengthwise on the driver's side or, in exceptional cases, even crosswise at the front of the parking space (depending on length of garage and car).

The pedal stand can be adjusted in height to fit the wide variety of bicycle types.

Please detach here and send by fax +49 7565/508-88 or post to Klaus Multiparking.
